

## Smiley's LowPoly Tabletop Items Pack – Stylized Interactive Objects

**Perfect for inspection systems, puzzle games, and immersive environments.**

A curated collection of small, detailed everyday objects designed for Unity.

Built with a **vertex color workflow**, this pack is lightweight, flexible, and ideal for close-up interaction and scene detail.

### **Included Assets**

- AshTray (Empty & Full)
- Bottle Opener
- Can Opener
- Cigarette & Cigarette Pack
- Coaster
- Corkscrew
- Flashlight
- Fountain Pen
- Jewelry Box
- Key Ring (with 4 Keys)
- Lighter
- Mug
- Pen (Red & Blue)
- Pocket Knife
- Remote Control
- Scissors
- Sherlock Pipe
- Smartphone
- Spiral Notebook
- Tissue Box (Rectangle & Square)

- Urn (with Lid)
- Vase
- Wallet

## **Materials & Rendering**

This asset uses a **vertex color shader** for most objects, keeping performance high and setup simple.

### **Material Assignment Overview**

#### **Metal Material**

Apply the **Metal** material to the following parts:

- Urn body & lid
- Vase
- Scissor blades
- Pocket knife blade
- Key ring loop
- Individual keys (each key uses its own **Key Metal variant**)
- Lighter flame guard
- Jewelry box clasps & handles
- Corkscrew spiral bit
- Can opener cutting wheel
- Bottle opener head

#### **Clear Material**

Apply the **Clear** material to:

- AshTray (Empty)
  - AshTray (Full)
  - Red pen cylinder
  - Blue pen cylinder
-

## Vertex Color Shader (Default)

- All **other surfaces** use the included vertex color shader
  - No additional material setup is required for these
- 

## Key Features

- Lightweight and optimized
  - Consistent real-world scale
  - Clean topology
  - Vertex color workflow (minimal texture use)
  - Easy material customization
  - Ideal for interaction systems and close-up inspection
- 

## Setup Instructions

1. Import the package into your Unity project
  2. Open the demo scene (if included)
  3. If models appear gray or unlit:
    - Assign the included vertex color shader
    - Ensure compatibility with your render pipeline (Built-in / URP)
- 

## Usage Notes

- Designed with **interactive objects** in mind (pickup, inspect, etc.)
- For accurate placement in Unity:

 Set the transform tool to **Pivot mode (not Center)**

---

## **Demo Scene**

A demo scene is included to showcase proper setup and intended use.

---

## **Support**

If you encounter issues, check:

- Shader assignment
- Material setup
- Pivot mode setting
